**SOLID BRITISH**  
HANDMADE FURNITURE

We are proud to support  
British manufacturing & keep  
Britain working

*The Malvern collection is manufactured in the U.K. from solid pine throughout using the finest raw materials and time honoured production techniques.*

*With traditional styling that includes bun feet and curved serpentine tops the range is manufactured using dovetailed joints and tongue and groove backs and drawer bases.*

*In addition to the chests of drawers shown overleaf, any chests of the same height can be joined together and given a single top in order to create a larger piece of furniture to suit your needs.*

*A sister range, the Norton collection, is also available.*

*This collection encompasses all of the same pieces of furniture as the Malvern, but has a plinth instead of bun feet and square tops to give a more contemporary look.*

*For further information please contact your local stockist.*
